

# M.S. in Data Science - Statistics Track

---

## Degree Requirements

Students in the Master of Science in Data Science (MSDS) program must successfully complete 30 credits based on any of the following options:

- Courses (30 credits)
- Courses (27 credits) + MS Project (3 credits)
- Courses (24 credits) + MS Thesis (6 credits)

Independent of the chosen option, all core courses in the respective tracks are required.

At most two courses can be chosen from outside the respective track with approval of the respective Program Co-Directors. Computational track students are allowed at most three electives that are non-Computer Science courses. Statistics track students are allowed at most three electives that are non-Math courses.

If a student chooses the MS project or MS thesis option, the project or thesis must be related to data science and requires approval from one of the Program Co-Directors.

The MSDS program has computational and statistics tracks that students must choose from at admission time. These tracks have different core courses but share the same admission requirements and electives.

Students may choose an elective outside the list after approval of their respective advisor.

## M.S. in Data Science

Code	Title	Credits
<b>Core Course Requirements for Statistics Track</b>		
MATH 660	Introduction to statistical Computing with SAS and R	3
MATH 661	Applied Statistics	3
MATH 678	Stat Methods in Data Science	3
CS 644	Introduction to Big Data	3
CS 675	Machine Learning	3
or MATH 680	Advanced Statistical Learning	
<b>Code Title Credits</b>		
<b>Electives and Foundation Courses 15</b>		
Computer Science Electives		
CS 610	Data Structures and Algorithms	3
CS 631	Data Management System Design	3
CS 632	Advanced Database System Design	3
CS 634	Data Mining	3
CS 636	Data Analytics with R Program (only available to students in the Math core)	3
CS 639	Elec. Medical Records: Med Terminologies and Comp. Imp.	3
CS 643	Cloud Computing	3
CS 645	Security and Privacy in Computer Systems	3
CS 656	Internet and Higher-Layer Protocols	3
CS 659	Image Processing and Analysis	3
CS 661	Systems Simulation	3
CS 670	Artificial Intelligence	3
CS 676	Cognitive Computing	3
CS 677	Deep Learning (Deep Learning(available only to students in statistics track))	3
CS 683	Software Project Management	3
CS 684	Software Testing and Quality Assurance	3
CS 681	Computer Vision	3
CS 708	Advanced Data Security and Privacy	3
CS 731	Applications of Database Systems	3

CS 732	Advanced Machine Learning	3
CS 735	High Performance Analytics Dat	3
CS 744	Data Mining and Management in Bioinformatics	3
CS 782	Pattern Recognition and Applications	3
YWCC 691	Graduate Capstone Project (Counting towards the elective credits requires the program director's prior approval. In addition, it needs to be completed with an external partner (industry, lab, or government), or with a faculty only if the same faculty is not the student's MS project or MS thesis advisor.)	3
<b>Math Electives</b>		
MATH 630	Linear Algebra and Applications	3
MATH 631	Linear Algebra	3
MATH 644	Regression Analysis Methods	3
MATH 660	Introduction to statistical Computing with SAS and R (only available to students in computational track)	3
MATH 662	Probability Distributions	3
MATH 664	Methods for Statistical Consulting	3
MATH 665	Statistical Inference	3
MATH 678	Stat Methods in Data Science	3
MATH 680	Advanced Statistical Learning	3
MATH 683	High Dimensional Stat Inferenc	3
MATH 699	Design and Analysis of Experiments	3
MATH 717	Inverse Problems and Global Optimization	3
MATH 786	Large Sample Theory and Inference	3
MATH 787	Non-Parametric Statistics	3
<b>Other Electives</b>		
BIOL 638	Computational Ecology	3
BME 698	Selected Topics	3
MGMT 635	Data Mining and Analysis	3
MGMT 630	Decision Analysis	3
FIN 600	Corporate Finance I	3
FIN 641	Derivatives Markets	3
FIN 642	Derivatives and Structured Finance	3
MRKT 630	Models Of Consumer Behavior	3
IS 631	Enterprise Database Management	3
IS 665	Data Analytics for Info System	3
IS 687	Transaction Mining and Fraud Detection	3
IS 688	Web Mining	3
BNFO 601	Foundations of Bioinformatics I	3
BNFO 602	Foundations of Bioinformatics II	3
BNFO 615	Data Analysis in Bioinformatics	3
BNFO 620	Genomic Data Analysis	3
<b>Total Credits</b>		<b>30</b>

## Recommended course sequence for M.S. in Data Science for Statistics Track

	Fall	Spring
Year 1	Math 660 Intro to Statistical Computing with R and SAS	Math 678 Statistical Methods in Data Science
	Math 661 Applied Statistics	CS 644 Big Data
	Free Elective	Math 630 Linear Algebra and Applications
Year 2	CS 675 Machine Learning or Math 680 Advanced Statistical Learning	Free elective or Masters thesis course
	Free elective or Master thesis for thesis	
	Free elective or Master project course
