

B.S. in Psychology

Designed for students with a strong interest in the psychological and behavioral sciences, the Bachelor of Science in Psychology emphasizes an applied scientific approach with a particular focus on studying human behavior in the digital age, including the psychological impact of the Internet of Things and the therapeutic uses of technology, as well as virtual reality, artificial intelligence, gaming, digital research methods, and countering malicious social engineering. The curriculum exposes students to foundational concepts in the psychological and behavioral sciences through rigorous coursework in theory, research methodology, and professional development, while simultaneously providing training in the applied skills to help address the unique challenges facing modern society.

(120 credit minimum)
